CHART THIS INNING

Group: _____

YOUR JOB

Chart the 7th inning of the demo game against Ridgeview on your iPad, one pitch at a time, as the screen calls it. Before each hitter, read his scouting on your iPad and decide how to attack him. Then check your Report tab against the screen. Round 1 is the Pitch Chart (Ridgeview hitting). Round 2 is the Offense Chart (us hitting).

ROLES · SWITCH AFTER EVERY HITTER

Tapper
Works the iPad. Only the Tapper touches it.

Spotter
Reads the screen out loud: each hitter's scouting, then type, spot, location, what happened.

Checker
Watches every tap. Wrong tap? **Undo last pitch**

PITCH CHART · EVERY PITCH

1. **Pitch type**, only when it changes
2. **Called spot**, left grid (required)
3. **Location**, right grid
4. **What happened**: **Took It** **Foul** **Swing & Miss**

In play? Skip step 4 and tap the result, how it was hit, Hard contact if called, and where it went. Then **Next Batter**. After the 3rd out, enter the runs and tap **Confirm**.

OFFENSE CHART · EVERY PITCH

1. **Pitch type**, only when it changes
2. **Location**
3. **What happened**: **Took it** **Foul** **Swing & miss**

In play? Tap the result, how it was hit, Hard contact or Moved a runner if called, and where it went. Then **Next hitter**. No called spot here: we don't know what their catcher called.

SCOUTING FIRST · BEFORE EVERY HITTER

- **Pitch Chart:** scroll down to **Pitch Sequencing** (his read from earlier at-bats) and **Batter scouting** (tags the app lit, the coach's notes).
- **Offense Chart:** scroll down to **What is coming**: what their pitcher throws in each count.
- Spotter reads it out loud. The group decides how to attack him, then the screen shows what we did.
- At the end of each round, check your Report tab against the screen.

IF YOU GET LOST

Raise a hand. A coach reloads the demo (**Load the 7th inning** in Safari) and your group re-charts from the top of the 7th to catch up. It's a practice game: nothing you tap is saved to the dashboard or sent anywhere.
